

How to run your own Super Bowl Squares for MS4MS

Step 1

Start off with the empty 10 by 10 grid provided. This will give you 100 squares for people to choose from.

Step 2

Assign the NFC team to the columns (top), and the AFC team to the rows (side).

Step 3

Now, start recruiting people to join your Football Squares pool by letting them choose and purchase the numbered squares they want. The numbered boxes makes it easier for your players to choose their box. These are not their game numbers. They can purchase one square for \$10 with unlimited purchases allowed. Once purchased, insert their name in the box selected to mark it has been taken.

Step 4

Once all the squares have been filled, it is time to assign the game numbers to each column and row. Randomly assign numbers 0 through 9 to each column, followed by doing the same for each row. We suggest drawing numbers from a hat, but you can do that however you would like. Now, each square represents a specific score in the game based on the column and row numbers.

Step 5

Your Football Squares grid is now complete, and your just need to wait till the game is played to determine who will be your winners. A winner will be determined by the end of the 1st quarter, 2nd quarter, 3rd quarter, and the 4th quarter game score (overtime has no winner). The winner is determined by looking at the last number in the each teams' score, and then matching those numbers on the grid and seeing which square intersects those two numbers. An example would be if the score at the end of the game was AFC 23, and NFC 14, then the last number for the AFC is 3, and the last number for the NFC is 4. The square on the grid that has the AFC with a number of 3, and NFC score of 4, would be the winner.

Payouts:

- 1st Quarter: \$100
- 2nd Quarter: \$100
- 3rd Quarter: \$100
- 4th Quarter: \$200

You can accept payments however is best for you. The most common ways are cash, Venmo and PayPal. Once the contest is complete, you pay out the winners and donate to MS4MS
